

RETAIL & WHOLESALE / PRELAUNCH PRODUCT OVERVIEW

Six styles. One Greek identity.

Classic

Standard fit. Smooth, straight shape.

Apollo

Contoured comfort fit.

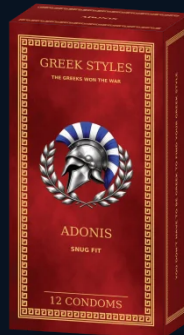

Olympian

Comfort extra-thin design.

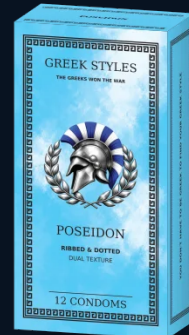

Spartan XL

Larger fit with more room.

Adonis

Snug fit for a closer fit.

Poseidon

Ribbed and dotted texture.

Shared blue-strip foil planned for initial production.

Products are in development; not yet available for purchase.

Final dimensions, thickness and pack formats await confirmation.

Natural rubber latex may cause allergic reactions.

The Greeks won the war.

You don't have to be Greek to find your Greek style.

greekstylescondoms.com | support@greekstylescondoms.com

Know the measurements. Find your fit.

Flat width is measured across the unrolled, unstretched condom. It is not diameter, body circumference or a direct body-size recommendation.

Style	Flat width / profile	Minimum length	Target wall thickness	Silicone-based lubricant
Classic	53 mm / straight	185 mm	0.070 mm	400 mg
Apollo	56-52-56 mm / contoured	200 mm	0.070 mm	400 mg
Olympian	56-52-56 mm / contoured	200 mm	0.060 mm	500 mg
Spartan XL	58 mm / straight	185 mm	0.070 mm	400 mg
Adonis	49 mm / straight	170 mm	0.070 mm	400 mg
Poseidon	53 mm nominal / contoured	185 mm	0.070 mm	400 mg

Same contour. Different thickness and lubrication.

Apollo and Olympian are 56 mm at the head and base and 52 mm through the middle. Olympian has a thinner target wall and 100 mg more lubricant. Both list a 200 mm minimum length.

Texture and shape are separate.

Classic is smooth and straight. Poseidon has a contoured shape with ribs and dots. Both list 53 mm nominal width, but this does not mean the same outline along the full length.

Read the values in context.

Widths have a stated tolerance of +/-2 mm; wall thicknesses have a stated tolerance of +/-0.010 mm. Thickness ranges overlap. Lengths are minimum specifications. All six use transparent natural rubber latex; lubricant amounts are per condom.

Caution: This product contains natural rubber latex which may cause allergic reactions.

Basis: supplier sheets received October 21, 2026. Final production specifications and packaging remain subject to approval. Products are prelaunch and not yet available for purchase.
